EDUCATION

University of Windsor

Bachelors in Computer Science.

Windsor, Ontario – Canada *Completed*

PROJECTS

Time t – AI Travel Planner App | React JS, MongoDB, Gemini AI, Firebase, Tailwind CSS

In Progress

- Developed a full-stack AI powered web application that generates personalized trip planning advice using Google Gemini AI.
- Built with the React framework (frontend) and Tailwind CSS alongside shadon/ui for a responsive, modular, and accessible user interface.
- Integrated Google Places Autocomplete for location-based suggestions during trip planning.
- Utilized Firebase Authentication to manage secure user access and sessions.
- Designed backend logic to store and retrieve trip plan data using MongoDB Atlas.
- Implemented intelligent filtering to help users refine travel options based on interests and preferences.
- Deployed the **frontend on Vercel**.
- Version control maintained via GitHub.

<u>TuMunch</u> - Food Ordering App | React JS, Express, MongoDB, NodeJS, Stripe (MERN)

Completed

- Developed a full-stack web application for food ordering, including a
 product showcase, shopping cart, user Authentication, order management system, live order status,
 search functionality and payment integration.
- Built with the React framework (frontend), Express/Node.js (backend), and MongoDB (database);
 payments processed using Stripe API.
- Created a custom authentication system in the backend to manage user sessions and persist cart data.
- Integrated a **food category filtering** feature that dynamically displays food items based on selected filters.
- **Hosted backend** on **Render**, used **UptimeRobot** to ping the webpage and configured **CI/CD pipelines** using **GitHub Actions**.
- Deployed frontend using GitHub Pages.
 Version control maintained via GitHub.

<u>Bayshore Library</u> – Library Management App | Node JS, Typescript, Express, MongoDB, Flutter, Dart, Firebase

Completed

- Built a full-stack library management app with role-based access:
 Librarians can add, update, delete books, while Patrons can view and search books.
- Frontend implemented using **Flutter** and **Dart**; backend built with **TypeScript**, **Express**, **NodeJS**, and **MongoDB**.
- Authentication handled via Firebase, with domain-based routing logic to direct users to different dashboards.

- Added form validation, user input sanitization, and error handling using Express-Validator.
- Configured CI/CD pipelines using GitHub Actions, deployed frontend on GitHub Pages.
 Version control managed through GitHub.

EchoLyf - Cross-Platform Music App | Flutter, Dart

Completed

- Developed a cross-platform mobile music player app for iOS and Android, featuring a sleek audio player, seek slider, album view, YouTube integration, and a Top 100 Music Chart.
- Built using the Flutter framework and Dart, and tested with Android Studio on devices including Pixel
 9XL simulators.
- Integrated Audiomack API for streaming real-time music content within the app.
- Included news updates using the NewsAPI, and weekly music chart data via the KoreanThinker JSON package
- Designed with responsive UI, including themed progress indicators, page refresh animations, and search functionality for music folders.
- Version control managed through GitHub.

Inventory Management Web App | Django, SQL Lite3, python, HTML5, CSS3

Completed

- Created a CRUD-based inventory system for managing company products with auto-incrementing IDs, search, add/update/delete product functionality.
- Developed using the Django framework, SQLite3 for the database, and HTML/CSS for the frontend.
- Version control maintained through GitHub.

TECHNICAL SKILLS

Languages: C, C++, java, python, dart, MySQL, MongoDB, NodeJS, assembly, HTML5, CSS3, JavaScript, R, typescript **Frameworks:** ReactJS, Flutter, Django

Developer Tools: Android Studio, Visual Studio, IntelliJ, Git, GitHub, GitLab Blender, Postman, Insomnia, Thunder Client. AWS, Google Cloud, Azure, Firebase

Other skills: Windows, MacOS, Linux, Unix, Microsoft Word, Microsoft Excel, Microsoft database, Microsoft PowerPoint, Microsoft publisher, Microsoft Outlook, Agile programming, Computer Networking, IT support, User Account Management, Version Control, Cybersecurity Basics, Error Debugging, Virtual environments, API integration, STFP, VPN's, Problem solving skills, Critical thinking, Quick decision making, Software Development Life Cycle (SDLC), Kubernetes, Docker, Temporal, CI/CD
