Completed

EXPERIENCE

Web Development & Digital Manager at Diamond Stagers – Brampton, Canada. Jan, 2025 – Jan, 2026

- **Designed, developed, and manage** responsive company **websites**, ensuring optimal performance and user experience.
- **Oversee all digital platforms** including **Facebook, Instagram, Tiktok, and YouTube** and create engaging content, managing ads, and analyzing performance metrics to boost brand visibility.
- **Run and optimize Google Ads campaigns** and implement **SEO strategies** to enhance search rankings and lead generation.
- **Advise management on digital marketing strategies** to improve online presence and attract new clients.
- **Create brand materials** such as **logos, banners, posters, and promotional graphics** that align with company branding and campaigns.
- **Edit and produce high-quality videos** for social media, strengthening brand storytelling and audience engagement.
- **Collaborate with the marketing team** to plan and execute campaigns that integrate both **technical and creative initiatives**.

PROJECTS

Pop Fruity – E-Commerce Beverage 3D App | Next JS, ThreeJS, GSAP, Tailwind CSS, Prismic CMS, Drei, **Completed**

- Developed **Pop Fruity**, an interactive beverage website that showcases various soda flavors.
- Built the frontend using **Next.js**, styled with **Tailwind CSS**, and integrated **Prismic CMS** for content management.
- Implemented **3D visuals** using **Three.js** and **Drei**, combined with **GSAP animations** for smooth, dynamic interactions.
- Designed a **playful and responsive interface** that highlights each flavor with immersive motion effects and intuitive navigation.
- Optimized performance and user experience by ensuring **fast load times**, cross-browser compatibility, and mobile responsiveness.
- Configured **CI/CD pipelines** using **GitHub Actions**, deployed website on **Vercel**.

Coach Career – AI Saas Career Guidance App | Next JS, TypeScript, Clerk, Neon Postgres, Inngest **Completed**

- Designed and developed a **full stack Saas AI powered web application** that delivers career related advice through interactive features such as; **an AI career chat, resume analysis**, **job compatibility feedback**, and **personalized career roadmaps**.
- Built with the **Next Js framework**, **tailwind CSS, Shadcn and spline components** for the front end, **Neon Postgres Database and Neon** for the backend.
- Integrated the **Inngest AI Agent Kit** to handle all the various AI related queries made from within the app.
- Implemented **React Flow** to display a career Roadmap with information from the database.
- Configured my **CI/CD pipelines** with **GitHub and Vercel.**
- **Version control** maintained via **GitHub**.

TuMunch - Food Ordering App | React JS, Express, MongoDB, NodeJS, Stripe **Completed** (**MERN**)

- Developed a **full stack web application** for food ordering, including a **product showcase**, **shopping cart**, **user Authentication, order management system**, **live order status, search functionality** and **payment integration**.
- Built with the **React framework** (frontend), **Express/Node.js** (backend), and **MongoDB** (database); payments processed using **Stripe API**.
- Created a **custom authentication system** in the backend to manage user sessions and persist cart data.
- **Hosted backend** on **Render,** used **UptimeRobot** to ping the webpage and configured **CI/CD pipelines** using **GitHub Actions**.
- Configured my **CI/CD pipelines** with **GitHub pages.**
- **Version control** maintained via **GitHub**.

EchoLyf – Cross-Platform Music App | Flutter, Dart **Completed**

- Developed a **cross platform mobile music player app** for **iOS** and **Android**, featuring a sleek **audio player**, **seek slider**, **album view**, **YouTube integration**, and a **Top 100 Music Chart**.
- Built using the **Flutter framework** and **Dart**.
- Integrated **Audiomack API** for streaming real-time music content within the app.
- Included **news updates** using the **NewsAPI**, and weekly music chart data via the **KoreanThinker JSON** package
- Designed with responsive UI, including themed **progress indicators, page refresh animations**, and **search functionality** for music folders.
- **Version control** managed through **GitHub**.
